C++ Project Proposal.....	1
1. Introduction:	1
2. Purpose of Project:	1
3. Objectives:	2
4. Project Work Flow How It Works:.....	2
5. Output Preview of Program:	3

1. Introduction:

This project is a simple Course Manager system which will be made in C++. It helps a student to manage their courses. The program will show 3 menus 1st one is Main Menu, 2nd one is Admin or Owner Menu, 3rd one is Student Menu. And I used all requirements in it.

2. Purpose of Project:

The purpose of this project is to check that we know C++ programming how much and make a useful system that manages course information.

3. Objectives:

- 1) Allows the admin to manage the courses.
- 2) Allows the students to view available courses and enroll in them.
- 3) Handle enrollments and seats using arrays.

4. Project Work Flow How It Works:

Step 1: Will shows a main menu with options:

- 1) Admin or Owner Menu
- 2) Student Menu
- 3) Exit

Step 2: User selects an option using switch.

Step 3: If "**Admin or Owner Choice**" is selected, will require password for admin, when password entered correctly it will show Admin or Owner Menu with options:

- 1) Add Course
- 2) View Course
- 3) Update Course
- 4) Delete Course
- 5) Back to Main Menu

Step 4: User selects an option using switch.

Step 5: If "**Add Course**" is selected, will add course using arrays.

Step 6: If "**View Course**" is selected, will view course which is stored in array.

Step 7: If "**Update Course**" is selected, will update course using course id/search function.

Step 8: If "**Delete Course**" is selected, will delete course using course id/search function.

Step 9: If "**Back to Main Menu**" is selected, will back to Main Menu using do-while loop.

Step 10: If "**Student Choice**" is selected, will, will show Student Menu with options:

- 1) View Course
- 2) Enroll in Course
- 3) View my Enrollments
- 6) Back to Main Menu

Step 11: User selects an option using switch.

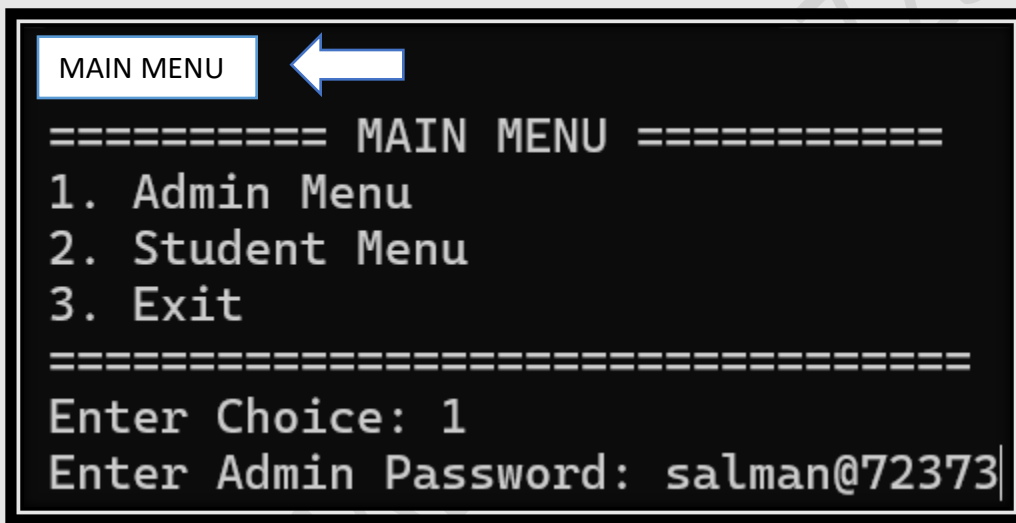

Step 12: If "View Course" is selected, will view course which is stored in array.

Step 13: If "Enroll in Course" is selected, will enroll student in course using array.

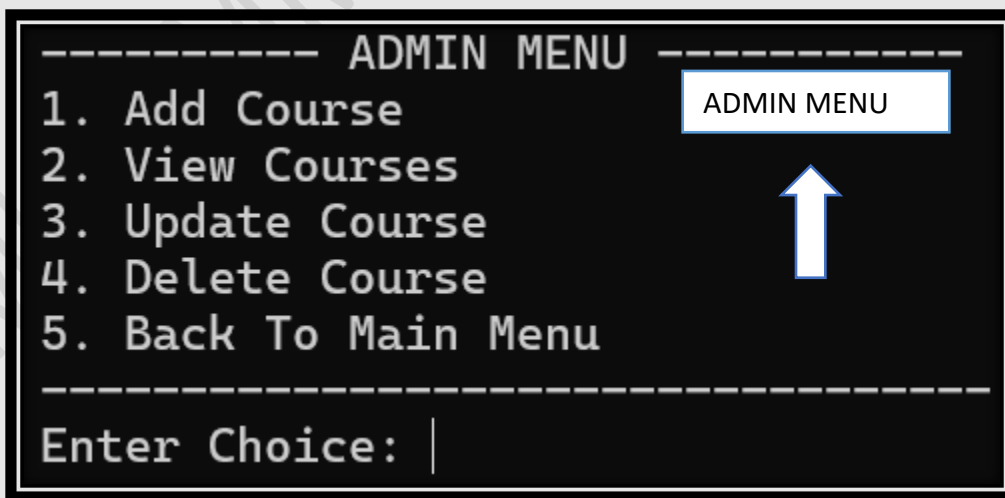

Step 14: If "View my Enrollments" is selected, will view enrollments in which student is enrolled.

Step 15: If "Back to Main Menu" is selected, will back to Main Menu using do-while loop.

5. Output Preview of Program:

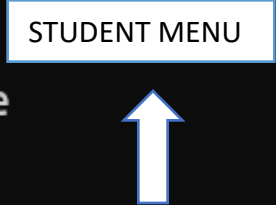

```
===== MAIN MENU =====
1. Admin Menu
2. Student Menu
3. Exit
=====
Enter Choice: 1
Enter Admin Password: salman@72373|
```

```
----- ADMIN MENU -----
1. Add Course
2. View Courses
3. Update Course
4. Delete Course
5. Back To Main Menu
-----
Enter Choice: |
```

```
----- STUDENT MENU -----
1. View Courses
2. Purchase/Enroll Course
3. View My Enrollments
4. Back To Main Menu
-----
Enter Choice: |
```

The diagram illustrates the relationship between the terminal output and a conceptual menu box. A white box labeled 'STUDENT MENU' has a white arrow pointing upwards towards the 'STUDENT MENU' header in the terminal window's output.
